

ABC Technologies – Company Policy Document

1. Introduction

ABC Technologies is a Software-as-a-Service (SaaS) company that provides cloud-based business management software for organizations of all sizes. The company is committed to providing secure, reliable, and customer-focused services.

2. Customer Support Policy

Customer support is available through email, live chat, and the customer portal.

Support Hours:

- Monday to Friday: 9:00 AM – 6:00 PM (UTC)
- Emergency technical support is available 24/7 for Enterprise customers.

The average response time is:

- Sales Queries: Within 2 hours
 - Technical Support: Within 4 hours
 - Billing Queries: Within 1 business day
 - Account Queries: Within 2 hours
-

3. Refund Policy

Customers may request a refund within 30 days of purchasing an annual subscription.

Monthly subscriptions are generally non-refundable after the first 7 days.

Refund requests require review and approval by a human supervisor before processing.

Approved refunds are processed within 7–10 business days.

4. Subscription Cancellation

Customers may request subscription cancellation at any time.

Cancellation requests require supervisor approval before becoming effective.

Access to premium services remains available until the current billing period ends.

5. Account Closure

Customers may permanently close their accounts by submitting an account closure request.

Account closure requests require manual verification and supervisor approval.

After account closure:

- Customer data is retained for 30 days.
 - Data is permanently deleted after the retention period.
-

6. Compensation Requests

Compensation requests for outages or service interruptions are evaluated individually.

Each compensation request requires approval from the Customer Success Manager.

7. Escalation Policy

Requests involving legal issues, repeated service failures, compensation, refunds, or management escalation must be reviewed by a human supervisor.

8. Privacy Policy

ABC Technologies protects customer information using industry-standard encryption.

Customer information is never shared with third parties without authorization.

Passwords are stored in encrypted form.
